

# 1 megawatt wind turbine cost

## Overview

---

Typical installed price for a 1 MW wind turbine is in the \$1. For budgeting, use a per kW basis of about \$1,200 to \$2,000 per kW, depending on site . buyers typically pay a wide range for a 1 MW wind turbine project, driven by turbine costs, installation, interconnection, and permitting. Assumptions: region, specs, labor hours. Typical . Dramatic Cost Range: Wind turbine costs span from \$700 for small residential units to over \$20 million for offshore turbines, with total project costs varying from \$10,000 to \$4,000+ per kW installed depending on scale and location. We'll also explore installation costs, financial incentives, and long-term return on investment.

### Wind Turbine Cost Guide 2025: Complete Pricing Breakdown (\$700)

Wind turbine prices range dramatically from \$700 for small residential units to over \$20 million for the largest offshore turbines, with total project costs varying significantly based on size,

### How Much Does A Wind Turbine Cost?

According to HomeGuide, the average cost for a commercial wind turbine ranges from \$2.5 million to \$4 million, with prices typically around \$1 to \$1.25 million per megawatt.

### 1 MW Wind Turbine Cost: Price Range and Drivers 2026

Typical total project price range for a 1 MW wind turbine is approximately \$1,600,000 to \$3,000,000 per turbine installed, with midpoints near \$2,400,000 in common commercial deployments.

### 1 MW Wind Turbine Price and Cost Guide 2026

Typical installed price for a 1 MW wind turbine is in the \$1.2 million to \$2.0 million range per megawatt. This includes equipment, installation, permitting, and interconnection.

### 1 Mw Wind Turbine Cost Review 2026 - One and Done Prep

### [1 Mw Wind Turbine Cost Guide 2026 - Adnan Painting and Remodeling](#)

The total installed cost for a 1 MW wind turbine typically ranges from about \$2.4 million to \$4.0 million per turbine under common U.S. conditions. The midpoint commonly falls near \$3.0

Cost ranges for a complete 1 MW wind turbine project typically span from roughly \$1.0 million on the low end to about \$2.4 million or more at the high end, with a common average near

### **1 MW Wind Turbine Cost Guide for U.S. Projects 2026**

Total project ranges for a 1 MW wind turbine typically span from about \$1.2 million to \$2.5 million, depending on hardware selection, site specifics, and regulatory requirements.

### **Cost Analysis: How Much Do Commercial Wind**

Wondering how much do commercial wind turbines cost? A utility-scale wind turbine costs between \$1.3 million to \$2.2 million per MW.

### **Cost of Wind Energy Review: 2024 Edition**

The 13th annual Cost of Wind Energy Review uses representative utility-scale and distributed wind energy projects to estimate the levelized cost of energy (LCOE) for land-based and offshore wind
