

1 million energy storage project

Overview

The Edwards & Sanborn solar-plus-storage project in California is now fully online, with 875MWdc of solar PV and 3,287MWh of battery energy storage system (BESS) capacity, the world's largest. Focused on sustainability and innovation, esVolta develops, owns, and operates reliable utility-scale energy storage assets across the entire lifecycle - delivering value for utilities, energy users, and investors. An energy storage project at Monolith Substation, Tehachapi, CA. Image: Sandia National Laboratories esVolta announced it has secured a \$110 million tax equity transaction with GreenPrint . AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. Credit: Scharfsinn via Shutterstock. The project is expected to be completed by 2025. The Hummingbird project will provide grid stability for PG&E and participate in CAISO's fast-response energy .
