

Approval process for installing photovoltaic panels

Overview

Before you go solar, you'll need to file for a permit approving your project. Solar permits typically require approval on two forms-one from your local building authority (to approve new construction), the other from your electric company (to approve interconnection to the grid). To help set project expectations, prepare for your installation and maximize long-term . Automated permitting is revolutionizing the industry: SolarAPP+ now provides instant permit approval in 275 jurisdictions across 13 states, reducing processing time from weeks to minutes for standard residential installations. The solar approval process is an important step that ensures your roof and electrical system can safely handle a photovoltaic system. Maxoptimus Green Energy Technology Pvt Ltd (MGetEnergy) is here to guide you through the journey of transitioning to clean energy, from the initial consultation to the final inspection.
