

Are there any solar sites in London

Overview

Iconic London landmarks including Tower Bridge, Hampstead Heath, and the Barbican Centre will be powered by renewable electricity from a new solar farm in Dorset. The City of London Corporation, which owns these sites, governs the capital's Square Mile global financial centre. The Department for Energy Security and Net Zero (DESNZ) plays a pivotal role in this green revolution. It helps foster the growth of renewable energy sources and, as part of this . Mayor of London Sadiq Khan (right) and shadow energy secretary Ed Miliband, walk past solar panels installed on the roof of Stoke Newington School in north London, during a visit to announce a new climate action plan for London on April 12, 2024. Data from the London Solar Opportunity Map, London Heat Map and the London Building Stock Model have been . We are pleased to announce the launch of the Solar Opportunity Map which shows the energy potentially available on all roofs and areas of open land for the whole of the capital out to the M25 motorway.
