

Argentina capacitor energy storage power station

Overview

Argentina's Ministry of Economy has invited proposals for a 500 MW battery storage project in Buenos Aires, requiring USD 500 million in investment. The project aims to modernise infrastructure, enhance grid stability, and attract private investment, with completion targeted . Fifteen companies submitted 27 proposals, offering 1,347 MW of capacity and over \$1 billion in investments, surpassing the tender's 500 MW goal. The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards . Argentina's Energy Secretariat has launched a national and international tender process to incorporate battery energy storage system (BESS) plants at critical nodes across the country, with an estimated investment of \$700 million.
