

# Bring your own batteries

## Bring your own batteries

---

### Virtual Power Plant (VPP)

Bring your own battery to AGL's VPP and save with bill credits. Learn how a VPP works, which batteries are eligible, and how to track your VPP use in the app.

### Bring your own battery programs: an overview

Bring Your Own Battery programs are a new type of program introduced by some utility companies to incentivize energy storage. The Bring Your Own Battery program works by connecting

### New York's BYOB Program: What Battery Owners Need to Know

Learn how New York's Bring Your Own Battery (BYOB) program works, who must enroll, and how much you can earn for your battery.

### Bring Your Own Device

You can save when you share stored energy through the Bring Your Own Device (BYOD) program! Choose your batteries and the amount of energy you'll share during peak energy use times and get a

### Storage Incentives

Also known as "BYOB" or "Bring your own Battery" incentives. These incentives are typically offered by utility companies to

customers in exchange for the ability to tap that customer's batteries in times of

### **UNY Bring Your Own Battery Program Guidelines**

Customers are compensated on a pay-for-performance basis for the average kW they curtail when dispatched in Demand Response events over the summer season. To participate in the program, the

### **Bring Your Own Battery (BYOB) Programs: An Overview**

What is a bring your own battery (BYOB) program? Learn how these energy storage incentives help homeowners and the grid at large.

### **Bring Your Own Battery Programs: Everything You Need to Know**

The motive behind utility companies providing a rebate or incentive for you to bring your own battery is that, in exchange, they can access your solar battery and the energy stored there.

### **Tapping into the power of bring-your-own-battery programs**

Each financial model offers flexible payment routing and enrollment mechanisms, which means utilities can use either for customers who own, finance, or lease their battery.

### **National Grid's Pioneering Residential BYO-Battery Demand**

ConnectedSolutions is the nation's first performance-based residential Bring Your Own Battery program. Through the program, National Grid allows battery owners across Massachusetts and Rhode Island
