

# Can solar rooftop electricity be used

## Overview

---

Rooftop solar panels are photovoltaic (PV) systems installed on building rooftops to capture sunlight and convert it into electricity. These systems convert sunlight directly into electrical energy through photovoltaic cells, providing clean, renewable power . In a perfect world, the average roof in the U. can generate around 21,840 kilowatt-hours (kWh) of solar electricity annually-that's more than most homes need. But also, the world isn't perfect. Use this buying guidance to learn more about your options, how to ask the right questions of .
