

# Children s Science Popularization The Principle of Solar Power Generation

## Overview

---

Plants use a process called photosynthesis to absorb sunlight and change it into the energy they need to grow. Larger solar cells are grouped to form PV panels, and PV panels are connected in arrays that can produce electricity for an . The sun is a giant ball of energy, constantly sending light and heat to Earth. Solar energy is light, heat, and other forms of energy given off by the Sun. Among th Itatics (PV) or indirect Generation.
