

Colombian PV and energy storage subsidies

Overview

To facilitate the adoption of this technology, the Government of Gustavo Petro and the Comfama compensation fund have launched subsidies and credit lines for households in strata 1, 2, and 3 to access solar panels without high costs. The programme will enable thousands of low-income households to generate their own electricity through sustainable solar solutions, under clear rules for operation, maintenance and territorial targeting. Colombia's Ministry of Mines and Energy has released for public consultation a draft resolution . Colombia Solar helps families turn sunlight into clean, affordable electricity, cutting energy bills by up to 80%. 1 billion initiative to install rooftop photovoltaic systems for approximately 1.

Colombian PV and energy storage subsidies

Sunshine for All: How Colombia's Solar Revolution is Cutting

In some cases, homeowners also install battery storage, which allows them to use solar energy even at night or during blackouts. In effect, a home's roof becomes a small, independent

Colombia - Solar

The Colombia solar scheme aims to enable vulnerable households to self-generate basic consumption with PV systems, reduce tax burdens, and add new solar capacity to the grid. Partial

Colombia to replace subsidies with solar for 1 million

Colombia will equip more than 1 million low-income households with solar systems to replace subsidies, cut bills and add capacity to the grid.

The measure, articulated through the CONPES Document 4158, places the installation of solar panels at the center of a public policy that redirects spending on subsidies toward clean energy

Government Subsidy for Home Energy Storage in Colombia: 2025

But here's the twist: government subsidies for home energy storage now offer a 40% cost slash on battery systems. Let's break down how this works and why 2025 is your best year to act.

Mobilizing Clean Energy Investments in Colombia:

It should be noted that while Colombia's installation of new clean energy projects was indeed affected by the COVID-19 pandemic, Colombia today displays strong transition readiness,

Colombia's \$2.1B Solar Program for Low-Income Households

Colombia is making a significant leap in renewable energy with a \$2.1 billion initiative to install rooftop photovoltaic systems for approximately 1.3 million low-income families.

Colombia promotes access to solar panels with subsidies and

With these initiatives, Colombia is moving towards a more sustainable energy model, ensuring that the adoption of solar panels is accessible to vulnerable households.
