

# Community use of honduras solar integrated energy storage cabinet fixed type

## Overview

---

Our lithium-based energy storage systems are specifically built for hot, humid environments like Honduras. This article explores how we're tackling the unique climate challenges of Central America through innovation, customization, and high-performance solar battery design. This report presents the work conducted by the National Renewable Energy Laboratory (NREL) on the rural electrification of Honduras, focusing particularly on schools and clinics and extending to support broader community development through productive uses of energy. This strategic move aims to tackle the country's high electricity costs and heavy reliance on fossil fuels, building on the company's previous success in Jamaica while addressing . According to the latest 2026-2035 Generation Expansion Indicative Plan (PIEG) released by the national dispatch center (CND), the Honduran power system is facing the retirement of 1,343 MW of thermal capacity, with the most severe retirements scheduled for 2029 and 2030, involving 886.06 MW and . As Central America accelerates its transition to sustainable energy, the Honduras San Pedro Sula Energy Storage Phase II Project stands as a pivotal initiative.
