

Container type 30 lithium battery

Overview

Lithium battery storage container, for the safe storage of used or damaged Li-ion batteries. Sturdy unit manufactured from sheet steel, with a cavity between inner and outer container, filled with PyroBubbles, (extinguishing media) ideal preventative for fire protection. Each distinct shipping guide in this document refers to the regulatory requirements for a specific lithium cell/battery type, configuration, and size. In this way, a shipper will easily find the applicable provisions that they must follow depending on the scenario they encounter as a shipper. Our goal is for you to become familiar with the current Lithium Batteries & Cells Shipping Guide by following these simple instructions and for you to use it as an ongoing source for the . This guide provides information to assist you in how to ship the battery by road in the ADR Contracting Parties. The provisions of the DGR with respect to . According to the classification of the *International Maritime Dangerous Goods Code* (IMDG Code), lithium battery goods belong to Class 9 dangerous goods. Depending on the specific product type, they are divided into seven entries, corresponding to the following UN numbers: When classifying lithium .

Container type 30 lithium battery

Battery Guidance Document

All lithium battery shipments, including when packed with or contained in equipment, must be declared by the net weight of lithium cells or batteries contained in the package.

LITHIUM BATTERIES (UN3090, UN3091, UN3480, UN3481)

These instructions have been specifically prepared for the shipment of lithium batteries fully regulated assigned to UN3090, UN3091, UN3480 & UN3481, in compliance with the provisions in P903 of the

Requirements for Shipping Lithium Batteries 2025

IUMI strongly supports the SoC limit of 30% for air freight and advocates similar principles for maritime transport. Regulations depend on battery size and packing method.

Lithium Battery Guide

Each distinct shipping guide in this document refers to the regulatory requirements for a specific lithium cell/ battery type, configuration, and size. In this way, a shipper will easily find the applicable
