

# Cost Analysis of DC Power Storage Containers for Water Plants

20 ft container

40 ft container

## Overview

---

This report is available at no cost from NREL at [www. Department of Energy \(DOE\)](http://www.DepartmentofEnergy.gov), operated under Contract No. When we talk about DC (direct current) storage costs, three factors dominate the conversation: \*Data source: 2024 Wood Mackenzie Energy Storage Report "Our 2023 Texas microgrid project combined 2MW solar with 800kWh DC . Recognizing these challenges and opportunities, WPTO has launched a new initiative known as HydroWIRES: Water Innovation for a Resilient Electricity System. HydroWIRES is principally focused on understanding and supporting the changing role of hydropower in the evolving U. DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment The U. The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year . NREL/TP-6A40-93281.
