

Deling Solar Power Generation

Overview

The Deling Invest 1 solar complex, spanning 24 hectares, will consist of six fields of solar panels, with 12 transformer stations. Its projected annual electricity output is some 40 GWh. The investor is Tuzla-based real estate developer . Distributed generation is the local production of electricity using solar, wind, CHP, fuel cells, and energy storage near the point of use, reducing transmission losses and improving grid resilience. The Tuzla Municipal Government has preliminarily agreed to construct a solar energy project of approximately 36 megawatts, called Deling Invest 1. Distributed generation may serve a single structure, such as a home or business, or it may be part of a microgrid (a smaller grid . June 16 (SeeNews) - Bosnian real estate developer Deling Invest plans to build a 36 MW solar power plant in Tuzla, estimated to cost 60 million marka (\$33. 7 million euro), the city said.
