

Do I need to pay a warranty deposit when installing photovoltaic panels

Overview

Over the typical 25-year warranty, your panels should pay for themselves and save an additional \$22,000+, making the warranty term more than adequate. The California Public Utilities Commission (CPUC) recommends that solar providers give out this guide during their first contact with potential customers. Version 4 of the Consumer Protection Guide was published in 2025. Solar providers submitting applications to interconnect residential solar . When you install solar, your warranty won't take the form of a single policy, but rather several different coverages offered by your installer and the manufacturers of your solar equipment. Today, most home solar energy systems include three primary coverages: product warranties, performance . In order to get the most out of your investment, it's important to know how solar panel warranties work and what types of warranties are available. In this article, we'll cover: Let's dive right in by identifying the two main types of solar panel warranties.
