

Do solar panels make sense

Overview

Solar panels are worth it for most homeowners, as long-term savings and increases in property value make up for the high initial installation costs. In other words, you can recoup the money spent on solar panels through electricity cost savings within about one decade-and then benefit from more savings after that. Home solar doesn't work for everyone, though. With the federal solar tax credit ending, leasing a system . Net Metering Changes Affecting New Installations: Several states have reduced net metering compensation rates, impacting the economics of new solar installations and making system sizing and battery storage considerations more critical for maximizing returns.

Do solar panels make sense
