Electricity sector in China

Overview
History
Sources
Storage
Demand response
Transmission infrastructure
Companies
Consumption and territorial differences

China is the world's largest electricity producer. It overtook the United States in 2011 after rapid growth since the early 1990s. In 2021, China produced 8,534 terawatt-hour (TWh) of electricity, which was approximately 30% of the world's electricity production. Most of the electricity in China comes from coal power, which accounted for 62% of electricity generation in 2021 and is a big part of greenhouse gas emissions by China.

Electricity sector in China
