

EPB Energy Storage Power

Overview

EPB has 45 MW/95 MWh of front-of-the-meter energy storage in service today, including the new microgrids, and another 45 MW it expects to deploy over the next 12 months, Keel said. EPB is expanding its commitment to reliable energy by diversifying the EPB Local Energy Mix, which helps keep rates as low as possible while reducing the potential for community-wide outages. In Sale Creek, EPB recently commissioned its first microgrid designed to enhance resiliency in an area that . Katie Jereza, assistant secretary for the DOE's Office of Electricity, speaks at an event celebrating the deployment of battery-based microgrids in EPB Chattanooga's territory. Courtesy of EPB . What are EPB's Generation Use Cases?

How did we get into the Generation Business?

What have we done so far?

Why Energy Storage?

Commercialization of this functionality!!! . All EPB customers are benefiting from an innovative way that both reduces the cost of electricity and reduces the potential for community-wide power outages, officials of the utility said Friday. That is being done with a diversified mix of energy such as traditional fuels like natural gas and coal . The Clean Energy States Alliance (CESA) is a national, nonprofit coalition of public agencies and organizations working together to advance clean energy. CESA members-mostly state agencies-include many of the most innovative, successful, and influential public funders of clean energy initiatives . In Tennessee, municipal utility EPB is scaling up its battery fleet in order to improve grid resilience and also shave costs for its customers. The Sale Creek battery outside Chattanooga, Tennessee, kept the lights on for local residents during an unanticipated outage in October.

EPB Energy Storage Power

EPB will pursue smaller projects

EPB staff members have been given more leeway to pursue smaller scale energy storage projects, which leaders said will enable the Chattanooga utility to keep costs low for

Stored Energy Through Batteries Giving EPB Backup Capacity
