

Embedded photovoltaic bracket

**Efficient
Higher Revenue**

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPP Trackers, 150% DC Input Oversizing
- Max. PV Input Current 16A, Compatible with High Power Modules

**Intelligent
Simple O&M**

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

**Flexible
Abundant Configuration**

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AFCI Function (Optional): when an arc fault is detected the inverter immediately stops operation

Overview

As solar energy adoption surges globally (up 35% year-over-year according to the 2024 Renewable Energy Market Report), embedded photovoltaic brackets are emerging as the installation solution beating traditional mounting systems at their own game. The invention relates to a frame-embedded photovoltaic power-generating roof bracket which comprises an upright pole, wherein a steel frame is installed on the upright pole, solar battery assemblies are installed on the steel frame by a bracket which comprises profile frames, the solar battery . Latest version of photovoltaic embedded bracket specificat adjustable photovoltaic support structure taic modules, mounting systems, inverters, power transfor er. Therefore its optimization may have different approaches. In this paper, the mounting system with a fixed tilt angle has been stu cally . To ensure the smooth installation of photovoltaic system brackets and meet design requirements, Guidance Method For The Installation Of PV System Brackets are provided, including ground-mounted, rooftop, adjustable tilt angle, floating, Building-Integrated Photovoltaics (BIPV). Designed for durability and precision, our brackets ensure stability and efficiency in residential, commercial, and industrial applications. Each product complies . Let's face it - when most people picture solar installations, they imagine shiny panels catching sunlight, not the metal bits buried in concrete.
