

Energy Storage Box Policy

Overview

These targets set a required amount of energy storage, typically expressed in megawatts (MW), that must be developed or procured by a certain date. The Clean Energy States Alliance (CESA) is a national, nonprofit coalition of public agencies and organizations working together to advance clean energy. CESA members-mostly state agencies- include many of the most innovative, successful, and influential public funders of clean energy initiatives . In response to increased State goals and targets to reduce greenhouse gas (GHG) emissions, meet air quality standards, and achieve a carbon free grid, the California Public Utilities Commission (CPUC), with authorization from the California Legislature, continues to evaluate options to achieve . In this eight-chapter report, our lawyers analyze the key trade, financing, regulatory, investment, and policy developments shaping the energy storage market in 2026 and beyond and outline practical considerations for managing risk and positioning projects for long-term success.

Energy Storage Box Policy

Policy statement 572

The American Society of Civil Engineers (ASCE) supports the maintenance, development, reliability, and resiliency improvements of energy storage systems (ESS) to improve the reliability of the United

Energy Storage Policy Committee Slides (July 2025) , ACP

The slides from ACP's Energy Storage Policy Committee briefings consolidate complex federal, state, and market developments into actionable insights you can't get anywhere else.

2026 ENERGY STORAGE POLICY & MARKET ROADMAP

In this eight-chapter report, our lawyers analyze the key trade, financing, regulatory, investment, and policy developments shaping the energy storage market in 2026 and beyond and outline practical

EXECUTIVE SUMMARY Key Findings

Energy storage is not a new phenomenon, given the early history of harnessing power through water wheels and mill ponds, but in recent years, storage has gained increased attention with

Energy Storage Targets , State

Energy Storage Policy

In addition to the state survey, we also surveyed six energy storage development companies and one industry consultant, to compare their policy priorities with those of the state energy agencies.

Regulation, Policy, and Valuation , PNNL

PNNL provides expertise in regulatory and policy analysis for energy storage, including economic valuation, asset optimization modeling, regulatory treatment, policy strategies, and market design.

Climate Policy Dashboard

A table of all existing state energy storage procurement mandates, targets, and goals, as well as progress to date.

Energy Storage Policy and Regulation

CEG provides information, technical guidance, policy and regulatory design support, and independent analysis to help break down the barriers to energy storage deployment and advance the

Policy Recommendations to Unlock the Value of Long-Duration

Long-duration energy storage (LDES) will play an increasingly important role in decarbonizing the power sector as more variable renewable energy is added to the electric power grid. LDES is defined by the

Energy Storage

This rulemaking identified energy storage end uses and barriers to deployment, considered a variety of possible policies to encourage the cost-effective deployment of energy storage systems,
