Overview

Parliament passed the Energy Efficiency and Conservation Bill, 2024, on March 27, establishing a framework for mandatory audits, performance standards, and clean technologies to combat energy waste amid rising demand and climate pressures. It is to establish a legal, institutional, and regulatory framework to enhance energy efficiency and conservation in Uganda. We bring together stakeholders from government, private sector, academia, and civil society to accelerate the adoption of energy-efficient technologies and practices. Without energy efficiency measures, massive investments in new energy generation capacity are needed, and deforestation will continue unabated. Uganda commits itself to protect the climate by signing the Paris Agreement and submitting the Nationally Determined Contributions. Efficiency measures are. The Inclusive Markets for Energy Efficiency in Uganda Phase II (IMEU-II) is a three-year project funded by the Embassy of Sweden. Through its work, the IEA advocates policies that will enhance the.
