

# Energy-efficient solar system installation in North Macedonia

51.2V  
200Ah/300Ah  
LiFePO4 battery

## Overview

---

North Macedonia's new Law on Energy Efficiency brings a long-term strategy for the reconstruction of buildings and the obligation to set up solar collectors on public buildings. It envisages financial support for investments in solar panels, geothermal systems and smart . Public buildings in North Macedonia will soon be required to install solar systems, following recent amendments to the Energy Efficiency Law. This strategic move aims to tackle growing energy demands, accelerate the nation's transition to renewable energy, and critically, ensure the long-term . Construction of the North Macedonia-Greece gas interconnector began July 9, 2025, with an estimated project duration of 22 months.

## Energy-efficient solar system installation in North Macedonia

---

### [Law on Energy Efficiency Adopted: Lower Bills, Cleaner Air and](#)
