

Energy storage delays grid investment

Energy storage delays grid investment

[U.S. EV Battery Storage Projects Face Grid Interconnection Delays](#)

U.S. EV battery storage projects face grid interconnection delays in 2026, impacting charging infrastructure expansion and energy storage deployment.

[Gresham House Energy Storage delays GBP150m earnings target after](#)

Gresham House Energy Storage Fund (GRID) will not hit its GBP150m earnings target by the end of next year after the National Electricity System Operator (NESO) announced 2029

GRID delays GBP150m earnings target as connection dates move

Gresham House Energy Storage 10 Apr, 2026
GRID delays GBP150m earnings target as connection dates move
The update means four of the battery storage trust's five pipeline projects

GridStor warns of slowdown as Treasury delays BESS decisions

As detailed in its 2022 sustainability report, the company's investments target solving power supply intermittency issues that could impede the growth of renewable energy.

[Grid connection delays top barriers to battery storage rollout, say](#)

An overwhelming 98 percent of delegates at Tamarindo's inaugural Investing in Battery Energy Storage conference in London identified grid connection delays as the biggest execution

[Executive summary - Electricity Grids and Secure Energy Transitions](#)

For this report, we developed the Grid Delay Case to explore the impacts of more limited investment, modernisation, digitalisation and operational changes than are envisioned in the IEA's climate

[Grid connection delays dominate as the biggest barrier to battery](#)

Gathered in London for Tamarindo's inaugural Investing in Battery Energy Storage conference, battery storage industry leaders agreed that grid connection delays are causing projects

Grid Interconnection Delays 2026: A Threat to US Energy

Grid interconnection delays threaten US energy growth in 2026 with a 2,600 GW backlog. Discover the economic risks & key solutions driving vital grid reform now.

[Record Renewable Energy Investment Exposes Critical Global Grid](#)

Unprecedented clean power deployment is now constrained by lagging investment in grid infrastructure and energy storage, making system flexibility the new bottleneck.

[Energy Storage Delays in California: A Wake-Up Call for Resilience in](#)

The recent delays in recommissioning Pacific Gas and Electric (PG&E)'s Elkhorn Battery Energy Storage System (BESS) at Moss Landing have exposed a critical vulnerability in California's
