Overview

The country is aligning its economic policies with EU standards, introducing incentives for renewable energy projects and energy efficiency improvements. A milestone was the issuance of the first Green Bond in October 2023, valued at EUR 10 million, for green initiatives. Research identifies twice the land needed to meet the country's electricity demand without unduly impacting nature and communities. With a population of just over two million people, the small Western Balkan country of North Macedonia is . The funds allow us to make our organic products competitive and ensure that our citizens are aware of the country's need to tackle biodiversity aspects, reduce air emissions and air pollution - with substantial effects on health and productivity - and follow up on effective waste managements . North Macedonia has cemented its position as a renewable energy frontrunner in the Western Balkans, demonstrating remarkable expansion throughout 2025. The nation has been connecting an average of nearly one megawatt of new green capacity to its grid every single day, a pace that underscores its . Energy is the golden thread that connects economic growth, social equity, and environmental sustainability. Packed with insights into solar, wind, hydro, and storage developments, regulatory frameworks, and investment opportunities, it is designed to inspire and inform decision- Western Balkans' energy transition1. After the evaluation, 67 .
