

# **Georgia Embedded Energy Equipment Container Battery Energy Storage System**

## Overview

---

The Twiggs BESS is designed to dispatch stored energy over a four-hour period, enhancing grid reliability and resilience while maximizing the value of intermittent renewable resources like solar. Georgia Power announced today that it has started construction on a new 200-megawatt (MW) battery energy storage system (BESS) in Twiggs County, southeast of Macon, Ga. just outside of the City of Wadley. The project, approved by the . The new facility will store renewable energy for use during peak demand periods and is expected to finish by 2027. The groundbreaking ceremony for the BESS project attended by local officials. Credit: Georgia Power/PRNewswire. 28, 2031, will be given preference.
