

Grid modernization nassau

Overview

The island is set to welcome innovative hybrid microgrid facilities that combine solar energy, energy storage, and microturbines. These integrated energy sources will create a flexible and reliable power system tailored to the island's unique energy needs. This growth reflects a surging demand for grid modernization, especially in densely populated urban centers. Bahamas Grid Company (BGC) said yesterday the first three months of its grid modernization efforts have led to . NASSAU, The Bahamas, Oct. 9, 2025 /PRNewswire/ - Six months after the launch of its Foundational Grid Upgrade Project and one year since providing restoration and maintenance activities, the Bahamas Grid Company (BGC) has released its first comprehensive Progress Metrics Report. "The Government of The Bahamas is committed to a new energy era where modernized infrastructure, clean energy, and major reforms drive down costs and enhance reliability for all Bahamians. This transformation won't happen overnight, but its impact will be game-changing.
