

# Grid-side energy storage 2025

## Grid-side energy storage 2025

---

### Energy storage

In July 2021 China announced plans to install over 30 GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed capacity as of 2022.

### U.S. grid-scale storage leaps 63%, residential storage 132%

The United States had a record quarter for battery energy storage deployment in Q2 2025, adding 5.6 GW of installations, said a report released by the American Clean Power

### [12.5GWh - World's Largest Grid-Side Energy Storage Project Begins](#)

Following the landmark agreement with Saudi Electricity Company (SEC) in early 2025 for the world's largest 12.5GWh grid-side energy storage project, BYD Energy Storage has launched

### Battery technologies for grid-scale energy storage

This Review discusses the application and development of grid-scale battery energy-storage technologies.

### A Comprehensive Review of Next-Generation Grid-Scale Energy

In order to achieve grid-scale storage

### Energy storage industry set aggressive goals for 2025

The battery storage industry in the U.S. has grown in leaps and bounds in recent years, surpassing its most aggressive targets to become one of the largest new sources of power on the grid.

technologies, the future of energy storage will require improvements in materials, recycling, deployment, and policy. These innovations will be necessary in

### U.S. Adds 58 GWh of New Energy Storage Capacity in 2025

Two-thirds of all utility scale energy storage capacity installed in 2025 was built in states won by President Donald Trump, including 9 of the top 15 states for new installations.

### [Top Grid-side Energy Storage Companies & How to Compare Them \(2025\)](#)

Explore comprehensive market analysis, key trends, and growth opportunities. As the push for cleaner energy accelerates, grid-side energy storage solutions are becoming critical.

### Today in Energy

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024

## **Energy Storage Rides a Wave of Growth but Uncertainty Looms:**

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.
