

Ground based solar panels

Ground based solar panels

New converter box/ solar power? , Fiberglass RV

While I'm at it, I think I'd like to put in a new converter box (is that the proper term?), and have it roughed in for future solar power connection. What do I need to look for when shopping for

Three 280 watt solar panels on Casita 13 , Fiberglass RV

Three 280 watt solar panels, WOW, that's a lot of power! A Buddy of mine went down this road so he (and friends) could play electric guitars in the back country. Six 2 volt deep cycle batteries

Ground-Mounted Solar Panels

Ground-mounted panels are easier to install and maintain than roof-mounted panels, and they can catch more sunlight than rooftop installations. Our guide explains the pros and cons of

Configuring Rooftop Solar for my Bigfoot th , Fiberglass RV

The pictured trailer is NOT MY Bigfoot 21. This helps illustrate where I can add solar panels. I added some "notes" describing the difference between the picture and my trailer, starting

Ground Mount Solar Panel Kits for Sale , GoGreenSolar

Our ground mount solar power kits can be installed yourself or by a licensed contractor. Each kit comes complete with tier-1 solar panels, grid tie inverters, and ground-mounting hardware. Choose our

Installing solar in a Casita LD in a day for under \$350

30-amp breaker - \$16: This runs between the panels and the controller. I prefer this to a fuse since it allows me to easily disconnect the solar from the controller when needed VHB 4950

All Electric Casita , Fiberglass RV

The solar panels cover about 85-90% of the roof so solar thermal loading is minimized. Time will tell. Regarding cost, I have about \$1500 invested in solar panels, inverter, LFP battery and

Solar Panel 101 for Dummies , Fiberglass RV

Sorry to flog the proverbial steed, but .. I know nothing about solar panels or electricity, but I'm interested in buying a small panel that I could set up on a sunny day to supplement my

Connecting Coleman solar panels

Technical question: has anyone connected two Coleman (40 watt each) solar panels to one controller for a 12 volt battery? If so where did you find the proper connectors that fit the

Replacing a solar panel , Fiberglass RV

Solar panel efficiency drops off as the temperature of the panel goes up. To help keep the panel temperature down you need to have a slight tilt on the panel and an air gap so cool air can

5000 BTU in a Casita , Fiberglass RV

What's the most wattage of solar panels anyone's ever successfully mounted on a Casita and how did they do it? I can't use panels sitting on the ground for this purpose because the system

RV Solar Calculator , Page 4 , Fiberglass RV

The things that I like a lot: SAFE: LFP battery
MONITORED: Battery data, solar data, and load use all available on Bluetooth. No display panels to install or use. I'm able to maximize LFP
