

Helsinki off-grid systems

Overview

Majamaja housing units rely on off-grid technologies for energy production and storage. Solar panels supply power, which is stored in high-efficiency batteries to operate the filtration system and essential electrical equipment. Heating is provided by clean-burning natural gas. With a leave-no-trace design, the prefabricated Majamaja Cabin by Littow Architectes draws visitors to a new eco-retreat at the water's edge. It demonstrates that it is possible to provide basic needs anywhere and serves as a concrete response to the global movement toward sustainable construction. Development & Innovation: . Our pioneer off-grid retreat is easy to access by car, bicycle, public transport or boat from Helsinki city center and the Helsinki international airport.
