## History of turbochargers

---

### Who Invented the Turbocharger?

Learn about the history of turbochargers, including who invented them and how they were first used.

### History of Turbocharging o Turbosmart o Engineered To Win!

The dawn of mass-produced turbochargers emerged from the General Electric factory in the early 1900s, marking a pivotal moment in the evolution of engine technology.

### [History of the Turbocharger , Articles , Grassroots Motorsports](#)

After the war, experience with turbocharger technology led engineers to experiment with automobile applications during the 1950s and '60s. Home-built hotrods and race cars sporting turbos

### Turbochargers: A History

However, it wasn't until 1905 that turbochargers began to take shape, when Swiss engineer Alfred Buchi, head of diesel engine research at Gebruder Sulzer, received a patent for a

### History of the turbocharger

### [A brief history of the development of automotive turbochargers](#)

Initially, turbocharging technology was mainly used in diesel engines, but with the advancement of technology, especially the realization of direct injection technology, turbochargers

### **History of Turbochargers**

The history of the turbocharged motor is almost as old as the invention of the internal combustion engine itself. In this time Gottlieb Daimler (1885) and Rudolf Diesel (1896) attempted by precompression of

Turbochargers history from the beginning till nowadays. From the day the internal combustion engine was built

### **Turbocharger**

In an internal combustion engine, a turbocharger (also known as a turbo or a turbosupercharger) is a forced induction device that compresses the intake air, forcing more air into the engine in order to

### **The history of turbocharging**

Uncover the fascinating evolution of turbocharging technology throughout history. Explore the impact of forced induction on vehicles over time.

## 100 Years of Industrial Turbocharging

The year 2024 marks the 100th anniversary of the first turbocharger for large engines. Turbochargers are now a standard piece of equipment in any large application powered by an
