

# How can you dismantle photovoltaic panels without them falling down

## Overview

---

Solar panels can be disconnected by shutting off AC and DC disconnect switches, covering panels with opaque material, verifying zero voltage with a tester, unplugging MC4 connectors, and removing mounting hardware. Removing solar panels from a roof requires precision, safety, and technical know-how. Proper disposal of components is imperative for environmental compliance. Seek professional assistance if unsure about any part of the disassembly process. This guide explains reasons for removal, step-by-step procedures, safety precautions, permit considerations, disposal and reuse options, cost factors, and when to hire a professional.
