

# How much does a 50kW server rack cost in the US

## Overview

---

A: In the US, a standard full rack (42U, 3-5 kW) runs \$900-\$2,500/month all-in at a Tier 3 facility, depending on market and term length. High-density racks (10-30+ kW) in top-tier markets can exceed \$3,000-\$6,000+/month before bandwidth and cross-connects. The main cost drivers include cabinet height (in rack units), construction (steel, powder coating), security features, and any power distribution or cable management accessories. This article provides practical . Standard rack installation: \$500 to \$2,000 per rack. It's a function of market, power density, bandwidth model, contract term, and whether the salesperson on the other end of the phone thinks you're a sophisticated buyer or a . The average asking price for wholesale colocation services in primary North American markets is now about \$195. 94 per kW per monthfor deployments in the 250 kW to 500 kWrange. Smaller deployments and single-rack requirements often cost more per kW because they do not benefit from the same scale.
