

How much does a Sanaa solar inverter cost

Overview

On average, the total cost of a solar inverter for a medium-sized solar panel system installation ranges from \$800 to \$3,000. The pricing of solar inverters varies depending on their size and whether they are string inverters, microinverters, or string inverters with DC power . The size of your solar system (measured in kilowatts, or kW) directly impacts the size-and, therefore, the cost-of your inverter. Think of it like this: a small apartment needs a smaller AC unit than a large house. The same principle applies here. String inverter systems cost less up front, but systems using microinverters last . Use our calculator to quickly get price cost estimates for your specific project.
