

# How much does a storage cabinet starter battery cost

## Highvoltage Battery

## Overview

---

The cost of the lithium battery for an energy storage cabinet can range from \$5,000 to \$20,000, depending on various factors. These factors include capacity needs, specific technological features, and brand reputation. The information focuses on . In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region . How much do storage systems cost in California in 2026?

As of April 2026, the average storage system cost in California is \$1031/kWh. Get personalized solar quotes and start saving on your electricity bills today. A typical 10 kWh battery system costs around \$11,500 before the federal tax credit, or \$8,050 after the 30% ITC.
