

How to connect solar power generation to load

Overview

A backfeed breaker can be used to connect a solar PV system to the load-side of a service. There are several different ways this can be done per the NEC but the most common method for solar residential installs is by connecting it to the end of a busbar using the 120% rule . Connecting solar panels to the electrical grid is one of the most effective ways to maximize your solar investment while maintaining reliable power. Grid-tied solar systems allow you to use solar energy during the day, sell excess power back to the utility through net metering, and draw from the . Here are design tips for methods of PV system utility interconnection. The components needed include solar panels, an inverter (or converters), and connection cables.
