

How to use a snow shovel for photovoltaic panels

Overview

The safest way to remove snow from solar panels is by using a soft, non-abrasive foam snow broom with an extension handle. Avoid metal roof rakes, hard brushes, or shovels, which can scratch the surface and void warranties. Always work from the ground when possible. Let me walk you through some safe and effective ways to handle . Winter snow can cut solar production when it builds up on your array, but you don't always need to take action. A light dusting often slides off or melts on its own. Heavy, wet snow can cover the modules long enough to block sunlight and push output close to zero until the panels clear.
