Sungrow BESS Innovation: Shaping the Next Day for Energy

Summary: The fast acting frequency regulation is critical under the condition of high level of renewable generation, especially ESO need to manage the system with low levels of inertia.

System Manual ST2752UX-SE

A drainage system is necessary to prevent the bottom or internal equipment of the BESS from being soaked in water during the rainy season or during heavy rainfall.

Energy Storage System

World-leading Energy Storage System & Solar Inverter

Sungrow, as an energy storage system and solar inverter supplier, shoulders the responsibility of environmental protection and the usage of new energy.

The core components of these systems include PCS, lithium-ion batteries and energy management systems. These "turnkey" ESS solutions can be designed to meet the demanding requirements for

It adopts standard BESS design and modular design to realize the integration of energy storage system. Through liquid cooling method, it can better balance the system temperature.

PowerStack

The system supports up to 10 ESS cabinets in parallel. The cabinet with an EMS is accessed to the customer network and connected hand-in-hand with other cabinets that do not have EMS.

Introduction to sungrow energy storage

With the Sungrow residential energy storage system, you can store surplus electricity for later consumption and control your energy cost, gaining energy independence.
