

# Is there any lead-acid battery maintenance for communication base stations in Chad

## Overview

---

Since on-site maintenance is costly and infrequent, batteries are designed to be low-maintenance: sealed lead-acid batteries require no water refills, while LiFePO4 batteries have no moving parts. Telecommunications infrastructure, including cell towers, base stations, and communication hubs, requires a constant and reliable power supply. Lead-acid batteries serve as a dependable source of backup power to ensure continuous connectivity in the event of grid outages or power fluctuations. Regular Visual Inspections Perform frequent visual checks to . Telecom base stations-integral nodes in wireless networks-rely heavily on uninterrupted power to maintain connectivity. Advanced strategies involve predictive analytics, upgrading to smart systems, and .
