

Japan China Enterprise Communications base station inverter connected to the grid

ESS

Overview

Japan has launched an investigation into Chinese-made solar panels over fears they may contain hidden communication devices capable of disrupting the nation's power grid - a security concern that analysts say could accelerate a shift towards domestic clean-energy . Japan has launched an investigation into Chinese-made solar panels over fears they may contain hidden communication devices capable of disrupting the nation's power grid - a security concern that analysts say could accelerate a shift towards domestic clean-energy . Japan has launched an investigation into Chinese-made solar panels over fears they may contain hidden communication devices capable of disrupting the nation's power grid - a security concern that analysts say could accelerate a shift towards domestic clean-energy technology. The inquiry follows . U. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country. A Reuters investigation, citing two individuals familiar with the matter, revealed .

[Rogue communication devices found in Chinese solar power inverters](#)

Chinese companies are required by law to cooperate with China's intelligence agencies, giving the government potential control over Chinese-made inverters connected to foreign grids,

Communications Backdoor in Chinese Power Inverters

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of them said.

[U.S. Authorities Investigate Communication Devices in Solar Power](#)

Technical experts conducting detailed hardware inspections, or "teardowns," of inverters connected to U.S. power grids revealed the presence of unauthorized communication modules,

[US uncovers hidden radios in Chinese solar inverters, sparks alarm](#)

A Reuters investigation, citing two individuals familiar with the matter, revealed that undocumented components were found during security inspections of inverters connected to the
