

Maldives solar energy policy

Overview

In the Maldives, solar panels have become a symbol of a country that rewrote its energy story. Behind the rapid rise in clean power lie institutions and frameworks strengthened to plan, manage, and scale solar, wind, and other clean power infrastructure. During the COP28 summit, I announced our ambitious commitment to provide 33 percent of national electricity needs from renewable sources by the year 2028. This target represents a significant step in our efforts to combat climate change, reduce carbon footprint, and secure a more sustainable future. The Energy Policy and Strategy 2024-2029 outlines a series of innovative initiatives, bold targets, and strategic investments that will propel Maldives towards a more sustainable future. In 2012, when the Government of Maldives. Key initiatives, such as the Energy Roadmap 2024-2033 are pivotal in driving the shift to renewable energy, reducing dependence on fossil fuels, and enhancing energy security. Projected to lose 80 percent of its land over the next few decades, the Maldives strengthened its commitment. For this, policies are an important tool. As the ministry is mandated with overlooking the energy sector and making policies for the energy sector, it is our responsibility to make policies harmoni Manifesto pledges and SDG Goal 7 targets.
