

# Microgrid power supply equipment

## Overview

---

Advanced microgrids enable local power generation assets-including traditional generators and storage-to keep the local grid running even when the larger grid experiences interruptions or, for remote areas, where there is no connection to the larger grid. Authorized by Section 40101(d) of the Bipartisan Infrastructure Law (BIL), the Grid Resilience State and Tribal Formula Grants program is designed to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate . ABB is a leading global supplier of components and solutions for Microgrids and Distributed Energy Resources (DERs). Ranging from small residential-scale microgrids to industrial-scale microgrids augmenting utility power, we can help meet your customers' needs. With global presence and support ABB . ABM is a leading nationwide provider of grid-interactive, turn-key microgrid solutions and utility battery systems utilized by diversified commercial and industrial customers, national retailers, utilities, and municipalities. Our powerMAX Power Management and Control System maximizes uptime and ensures stability, keeping the microgrid operational even under extreme . NLR has been involved in the modeling, development, testing, and deployment of microgrids since 2001.
