

Mobile outdoor base station main construction

ESS

Overview

Every mobile carrier - Verizon, AT&T, T-Mobile, Sprint, etc. - builds outdoor cell sites, typically referred to as "macrocells," to provide cellular coverage for their subscribers. These sites include antennas, a base station receiver, transmitters, GPS, and backup power. Learn the essential components, technologies, and challenges behind 5G. For construction . Satellites won't be replacing cell towers any time soon.
