

# Myanmar outdoor power supply production

## Overview

---

Generation capacity available for dispatch has been reduced by more than 2.5 gigawatts (GW), due to various factors, including the suspended operation of two large liquified natural gas (LNG)-to-power plants in Yangon, low precipitation and low water levels in hydropower. The power supply-demand gap has widened since 2021. This guide explores practical solutions, industry trends, and initiatives in the Mandalay-Naypyidaw corridor. In Yangon, a poultry farm manager in Yangon's 300+ annual sunny days make it ideal for solar-diesel hybrids. A typical 50 kW system. This report assesses underlying causes of the ongoing power sector crisis in Myanmar. The report was prepared by BART HOME SOLAR. In Myanmar's rapidly evolving energy landscape, mobile outdoor power supply has become a game-changer for both urban and rural communities.
