

# Nairobi household energy storage subsidies

## Overview

---

KOSAP (Kenya Off-Grid Solar Access Project): World Bank-funded, \$150M for 14 counties; partial subsidies on solar home systems with batteries up to 1kWh. Last Mile Connectivity: Free/50% subsidized mini-grids with lithium storage for underserved areas. Did you know Kenya's Ministry of Energy now offers government subsidies covering up to 30% of home battery costs?

With power outages affecting 68% of urban households and electricity prices soaring to KES 29/kWh, this program could slash your home energy storage expenses while securing 24/7 power. These incentives lower upfront costs by 20-35% on equipment imports, benefiting Nairobi and nationwide installations. Solar batteries qualify under the country's energy and economic needs. This progress has largely been complemented by a strong focus on renewable energy. The National Energy Policy 2025-2034 is therefore a tool in spearheading our country's vision of equitable energy transition, focusing on innovation, resilience, and sustainability to meet the needs of all Kenyans. Our guiding force that helps us see every day.
