

New Energy Storage Bend Pipe

Overview

There's power in the pipes that bring Bend's water from its intake at Bridge Creek to the city's water filtration at Outback. That may be enough to power more than 700 homes. This is an illustration of a Pelton wheel from one of Lester Allen Pelton's original patents. The 200MW BESS is under construction in Harris County, Texas, with a planned completion of early 2026. For fabricators across Arizona, California, Nevada, Utah, Colorado, Idaho, New Mexico, and Oregon, tube and pipe bending is no longer a secondary operation. Architectural rail, energy infrastructure, structural supports, and ornamental metalwork all rely on . These items include major projects that add capacity. For questions contact customer@ferc.gov . Shipping fee and delivery date to be negotiated.
