

# New Energy Storage Rise

## Overview

---

Energy Storage Market Outlook Q1 2026 (ESMO) released today by the Solar Energy Industries Association (SEIA) and Benchmark Mineral Intelligence, as of 2025, 137 GWh of utility scale storage has been installed in the United States. 19 GWh of commercial and . According to the U. energy storage industry installed a record-shattering 57. 6 gigawatt-hours (GWh) of new capacity in 2025, the largest single year of new battery capacity additions on record. Despite actions in Washington targeting clean energy, energy storage installations grew 30% from the previous . What is the future for the grid-scale energy storage market in Italy, now that the dust has settled from the country's long-awaited MACSE auction for BESS?

Energy-Storage. Courtesy: Ninedot Energy The U. This amount represents an almost 30% increase from 2024 when 48. The company noticed two overlapping trends: The batteries that were arriving at its recycling facilities still had plenty of life . German energy group Uniper SE (ETR:UN0) and Slovenia-based technology firm NGEN on Thursday broke ground on a 50-MW battery storage project in Wilhelmshaven, as part of efforts to strengthen grid stability and support renewable energy integration.

## New Energy Storage Rise

---

### [U.S. energy storage sets new record with 5.6 GW installed in Q2 2025](#)

The U.S. energy storage market set a record for quarterly growth in Q2 2025, with 5.6 GW of installations, according to the latest U.S. Energy Storage Monitor report released today by the

### [The Future of Energy Storage: Five Key Insights on Battery Innovation](#)

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping industries from transportation to utilities.

### Today in Energy

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024

### U.S. Adds 58 GWh of New Energy Storage Capacity in 2025

Despite actions in Washington targeting clean energy, over 600 GWh of energy storage is expected to be installed by 2030. This rapid deployment will help lower energy costs, enhance

## Energy storage industry set aggressive goals for 2025

The battery storage industry in the U.S. has grown in leaps and bounds in recent years, surpassing its most aggressive targets to become one of the largest new sources of power on the grid.

## Energy Storage's Meteoric Rise Breaks Another Record

The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, according to the latest U.S. Energy Storage Monitor report

## [Global news, analysis and opinion on energy storage innovation and](#)

American Battery Factory (AFB) has secured offtake agreements for 4.5GWh of its initial 5.5GWh US factory output. The industry's premier celebration of excellence, innovation and hard work returns this

## Energy Storage News , Today's latest by Renewables Now

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage

## [A new record: US added 58 GWh of new energy storage capacity in](#)

Two-thirds of all utility scale energy storage

capacity installed in 2025 was built in states won by President Donald Trump, including 9 of the top 15 states for new installations.

### [US Energy Storage Installations Reach New Quarterly Record in Q2](#)

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale energy storage as a solution to rising electricity prices and soaring
