

Nigeria s ultra-thin solar panels usher in

Overview

A firm, Qoray Mobility & Energies Limited (QMEL), has unveiled a new line of high-performance, locally manufactured solar panels under its flagship brand, Imperium. The move is said to be aimed at accelerating Nigeria's renewable energy transformation. Now, panel by panel, battery by battery, solar power is being used to power businesses and lives in the West African nation, offering a much-needed electricity source. It's September 2025, and the all-too familiar news, that the national power grid has collapsed yet again, spreads across Nigeria. A breakthrough \$200 million solar-grid deal and an agreement for a 500-1,000 MW panel factory signal the shift from importer to industrial player. The panels, available in 450W and 560W .
