

Nigerian company solar energy storage project

Overview

Nigerian utility company Kaduna Electric has announced plans for a 100 MW solar project with accompanying battery energy storage. The company signed a memorandum of understanding with Abuja-headquartered J-Marine Logistics Limited and its primary investor, ASI Engineering Limited . Nigeria's energy transition in 2025 is no longer being defined by incremental megawatts added to the national grid. Instead, it is being driven by a quieter but more consequential shift: the rise of decentralised, storage-backed power systems engineered for reliability, autonomy and economic . Eauxwell Limited, a leading Nigerian solar EPC firm, is a key player in this shift, delivering large-scale solar PV projects, battery energy storage systems (BESS), minigrids, and C&I installations. Below is a list of Eauxwell's five largest solar PV projects and largest battery energy storage . Our primary focus is delivering innovative, sustainable, and cost-effective renewable energy solutions to meet the growing energy demands across Africa. As a forward-thinking company, we design, implement, finance, operate, and maintain renewable energy systems particularly solar PV and energy . Empower New Energy has signed new agreements to develop two commercial solar-plus-storage projects in Lagos and Ogun State, partnering with Jendol Superstores and Juddy-Bolema Industries Limited. With this project's successful implementation, Elecod will .
