

Norway new energy storage equipment

To Strive forward No Energy Waste

- ✓ All in one
- ✓ 100~215kWh High-capacity
- ✓ Intelligent Integration

Overview

Norway is taking a historic step in the fight against climate change as the world's first full-scale value chain for carbon capture and storage (CCS) is now being launched. The Longship project marks a milestone in reducing industrial emissions - both in Norway and internationally. Welcome to Oslo, the Nordic hub turning energy storage equipment into climate action superheroes. With Norway aiming for 100% renewable energy by 2030, Oslo's storage solutions are like Viking longships - built for rough seas but steering toward calmer waters [3]. Renowned for its extensive hydropower infrastructure, the country utilizes reservoirs as dynamic energy stores, harnessing surplus electricity during low-demand periods . Norsk Hydro will invest about \$110 million after tax to build the Illvatn pumped hydro plant in western Norway. Norsk Hydro has approved the construction of the Illvatn pumped-storage project in Luster, western Norway, the company's largest hydropower development in more than 20 years, which will . Hydro has made the final investment decision for its largest hydropower development in over 20 years.

Norway new energy storage equipment

Norway Energy Storage Outlook

Complementing this tradition, Norway has made significant investments in battery storage systems, propelled by the rapid growth of electric vehicles. Repurposing used EV batteries for
