

Norwegian container power generation manufacturer

Overview

BOS Power specializes in sustainable propulsion, energy storage, and power generation solutions, ensuring the reliability of critical operations in industries such as marine, data centers, healthcare, energy, and telecommunications. From fully electric ferries to hybrid electric offshore support vessels, our energy-efficient solutions minimize fuel consumption and reduce environmental impact, helping propel the . PSW Power &Automation has signed a contract with Norwegian Electric Systems (NES) for delivery of energy storage containers for three hybrid upgrade on board the vessel M. North Pomor, Grand Canyon II, and Grand Canyon III. The solution is based on extensive experience from the offshore and maritime industry and is designed to deliver renewable power in a robust and scalable manner. It would take 170 million trees growing for 10 years to absorb the same amount of CO₂. More than 50% of the world's vessels with zero-emission technology are equipped . Located in the UNESCO World Heritage Geirangerfjord, Hellesylt Hydrogen Hub is a production facility and pioneering ecosystem for green hydrogen. Norwegian container power generation manufacturer

Shore Power - Powercon A/S

PowerCon supplies both high and low voltage shore power solutions and covers all vessel types, from the largest cruise ships to container ships to smaller fishing vessels and ferries as seen from some of

BOS Power , About , Learn more about who we are

BOS Power provides propulsion, energy storage and power generation systems with a focus on sustainability, quality and reliability.

Havkraft AS

Havkraft Wave Energy Converter (H-WEC) is a Norwegian-developed technology designed to extract energy from ocean waves. The solution is based on extensive experience from the offshore and

Hybrids grow at sea: Norwegian OSV owners lean into batteries

Norway has been a leader in maritime battery applications, representing one-third of global installations. Battery systems provide flexible power, operating in several modes: harbour mode,

Nordic Batteries

Our products offer robust, high-performance

Corvus Energy , Powering a clean future

More than 50% of the world's vessels with zero-emission technology are equipped with Corvus Energy systems. That's equivalent to over 1,100 years of operation. Commitment to innovation and

Norwegian Hydrogen

European logistics company and shipowner Samskip has selected Norwegian Hydrogen as preferred supplier for liquid green hydrogen (LH 2) for the two SeaShuttle container vessels it has

power solutions suitable to power a variety of defence applications, including portable military electronics and communication systems.
