

Off-grid solar-powered mobile container in Port of Spain

Overview

The Nomad Energy Box is a pre-wired solar PV array integrated in a shipping container with a retractable folding rack mechanism that rolls onto the ground on wheels that match the terrain. With Spain's 2,800+ annual sunshine hours and rising energy prices, the initiative is being carried out in collaboration with the Port Authority of Valencia (APV), the . This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power solution. Solarcontainer explained: What are mobile solar systems?

The Solarcontainer represents a grid-independent solution as a mobile solar plant. Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel . The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. With Spain's 2,800+ annual sunshine hours and rising energy prices (€).
